the subject of the politics of knowledge production is as old as knowledge itself and remains hotly contested especially among scholars among others Mokoko Sebola, Tawanda Nyawasha and Molefi Asante have recently made controversial contributions on this subject in relation to Africa in general and South Africa in particular. In this book the author draws from an Afrocentric paradigm to present an alternative and refreshing perspective on the politics of higher education, scholarship and ethics in Africa. While the book draws heavily from the South African experience, it also offers lessons for Africa, the Black World and the Global South. It begins with an extended critique of Sebola's contribution on the subject and then synthesizes his views with the Nyawasha-Asante debate on the same subject. While the book's point of departure is to draw attention to the limitations of the works of the aforementioned scholars, it raises the discourse by switching from an individual to systems level of analysis. Kgathatso B. Shai is an associate professor and head of Cultural Political Studies at the University of Limpopo in South Africa. He was educated at the Universities of Venda and Limpopo, South Africa, where he received a PhD in International Politics. He has published widely in many peer-reviewed national and international journals. His special research interest is on Afrocentric and protest scholarship.

How students get the materials they need as opportunities for higher education expand but funding shrinks from the top down, shadow libraries explores the institutions that shape the provision of educational materials from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies. More recently, the several open publication models that have emerged in the higher education sector from the bottom up, shadow libraries explores how simply students get the

materials they need it maps the ubiquitous practice of photocopying and what are in many cases the more marginal ones of buying books visiting libraries and downloading from unauthorized sources it looks at the informal networks that emerge in many contexts to share materials from face to face student networks to facebook groups and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online the shadow libraries of the title if alexandra elbakyan s sci hub is the largest of these efforts to date the more characteristic part of her story is the prologue the personal struggle to participate in global scientific and educational communities and the recourse to a wide array of ad hoc strategies and networks when formal authorized means are lacking if elbakyan s story has struck a chord it is in part because it brings this contradiction in the academic project into sharp relief universalist in principle and unequal in practice shadow libraries is a study of that tension in the digital era contributors balázs bodó laura czerniewicz mirosław filiciak mariana fossatti jorge gemetto eve gray evelin heidel joe karaganis lawrence liang pedro mizukami jhessica reia alek tarkowski

policy makers advocates and scholars have long concentrated on the importance of equal access to primary and secondary education as a foundation for a democratic and just society despite the growing importance of higher and specialist education in an increasingly

technological and skill focused global market tertiary education has attracted much less attention and yet universities and colleges are epicentres of egregious disparities in access which impinge on traditionally marginalized communities such as racial minorities migrants indigenous populations and people with disabilities by drawing attention to this issue and assembling first rate material from scholars and policy makers across the globe this book performs an invaluable service for those interested in understanding and fighting a highly significant violation of educational opportunity and social justice

the bantustans or homelands were created by south africa s apartheid regime as ethnically defined territories for africans granted self governing and independent status by pretoria they aimed to deflect the demands for full political representation by black south africans and were shunned by the anti apartheid movement in 1972 steve biko wrote that politically the bantustans are the greatest single fraud ever invented by white politicians with the end of apartheid and the first democratic elections of 1994 the bantustans formally ceased to exist but their legacies remain inscribed in south africa s contemporary social cultural political and economic landscape while the older literature on the bantustans has tended to focus on their repressive role and political illegitimacy this edited volume offers new approaches to the histories and afterlives of the former bantustans in south africa by a new generation of scholars this book was originally published as various

Lifestyle and epidemiology: the double burden of poverty and cardiovascular diseases in African populations examines the profile of non-communicable diseases (NCDs) in the rural South African population. The burden of diseases in South Africa is characterized by a combination of poverty-related diseases with emerging NCDs associated with urbanization, industrialization, and a Westernised lifestyle. Chapters in this book examine the effects of poverty, COVID-19, and other social factors on the prevalence of cardiovascular disease, reproductive health, and diabetes in rural South Africa.

There is nothing God cannot do. The making of a strong God-fearing woman is a true life story that talks about the real-life daily experiences faced by a young woman who faced opposition, hardship, and limitations in all areas of her life and how the power of God is revealed in her life as she continued to trust in God. How the challenges turn out to mould her character and her desire for knowing God the more from teenage pregnancy to failed relationship and how she turns out to be a star. This book reveals the power of God and the power of standing in the word of God. It is not over until God says it is over. This book is for a young man and woman growing up in the most hopeless situation with dire circumstances with determination to make it in life for the beautiful employed independent middle-class woman who has made it in life but lacks that one thing. So I ask myself: why am I so heartbroken? Why am I so empty? Why am I feeling betrayed? And all that are the words she uttered. Read further and be encouraged by the works of God that make the seemingly impossible to be possible. This is my testimony. More written testimonies are coming forth. Never give up. I say: never give up. God can do all things.

human actions are often deeply intertwined with religion and can be understood in a strictly religious context yet many volumes and articles pertaining to discussions of religion in the archaeological past have focused primarily on the sociopolitical implications of such remains the authors in this volume argue that while these interpretations certainly have a meaningful place in understanding the human past they provide only part of the picture because strictly religious contexts have often been ignored this has resulted in an incomplete assessment of religious behavior in the past this volume considers exciting new directions for

considering an archaeology of religion offering examples from theory tangible archaeological remains and ethnography

this open access book discusses current thinking and presents the main issues and challenges associated with climate change in africa it introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in african countries thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works climate change is a major global challenge however some geographical regions are more severely affected than others one of these regions is the african continent due to a combination of unfavourable socio economic and meteorological conditions african countries are particularly vulnerable to climate change and its impacts the recently released ipcc special report global warming of 1.5o c outlines the fact that keeping global warming by the level of 1.5o c is possible but also suggested that an increase by 2o c could lead to crises with crops agriculture fed by rain could drop by 50 in some african countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas the 5th assessment report produced by ipcc predicts that wheat may disappear from africa by 2080 and that maize a staple will fall significantly in southern africa also arid and semi arid lands are likely to increase by up to 8 with severe ramifications for livelihoods poverty eradication and meeting the sdgs pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate it is against this background that the african handbook of climate change adaptation is being published it contains papers prepared by scholars

representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in africa and working with communities across the african continent encompassing over 100 contributions from across africa it is the most comprehensive publication on climate change adaptation in africa ever produced

## **The Boy Who Never Gave Up**

South Africa has been reeling under the recent blows of an apparent resurgence of crude public manifestations of racism and a hardening of attitudes on both sides of the racial divide. To probe this topic as it relates to white South Africans, Afrikaners, and the National Institute for the Humanities and Social Sciences (NIHSS) convened a round table discussion. The discourse was rigorous. This volume comprises the varied and thought-provoking presentations from that event, including a keynote address by former President Kgalema Motlanthe, inputs from Melissa Steyn, Andries Nel, Mary Burton, Christi van der Westhuizen, Lynette Steenveld, Bobby Godsell, Dirk Hermann, Ernst Roets, and Nico Koopman, and closing remarks by Achille Mbembe and Mathews Phosa. It deals with a range of issues around whiteness in general and delves into the place of Afrikaners and the Afrikaans language in democratic South Africa, demonstrating that there is no homogeneity of views on these topics among white South Africans overall and Afrikaners in particular. In fact, in these pages, one finds a multifaceted effort to scrub energetically at the boundaries that apartheid imposed on all South Africans in different ways.

This groundbreaking book is a frank and critical observation of a hugely politically sensitive topic. Jenny Cargill, drawing on her experience of Bee over its 15-year history, presents an uncompromising and essential review of the policy, its results, and the lessons that can be learnt by drawing on case studies. Cargill challenges common perceptions of Bee and provides disquieting new evidence of policy doing the opposite of what it was designed to achieve. Trick or Treat is the first book to provide
