in this penetrating analysis of the social attitudes toward various major illnesses chiefly tuberculosis the scourge of the 19th century and cancer the terror of our own susan sontag demonstrates that illness is not a metaphor and shows why the healthiest way of being ill is one purified of metaphoric thinking once tuberculosis was identified as a bacterial infection it ceased to be a symbol of a romantic fading away or of a sensitive or artistic temperament and it could be treated and cured similarly we must today cease to think of cancer as a mark of doom a punishment or a sign of a repressed personality and recognize it for what it is one disease among many and often receptive to treatment from back cover
