*Teaching Musicians* 2008 brain aminergic pathways are organized in parallel and interacting systems which support a range of functions from homeostatic regulations to cognitive and motivational processes despite overlapping functional influences dopamine serotonin noradrenaline and histamine systems provide different contributions to these processes the histaminergic system long ignored as a major regulator of the sleep wake cycle has now been fully acknowledged also as a major coordinator of attention learning and memory decision making although histaminergic neurons project widely to the whole brain they are functionally heterogeneous a feature which may provide the substrate for differential regulation in a region specific manner of other neurotransmitter systems neurochemical preclinical studies have clearly shown that histamine interacts and modulates the release of neurotransmitters that are recognized as major modulators of cognitive processing and motivated behaviours as a consequence the histamine system has been proposed as a therapeutic target to treat sleep wake disorders and cognitive dysfunctions that accompany neurodegenerative and neuroinflammatory pathologies last decades have witnessed an unexpected explosion of interest in brain histamine system as new receptors have been discovered and selective ligands synthesised nevertheless the complete picture of the histamine systems fine tuning and its orchestration with other pathways remains rather elusive this research topic is intended to offer an interdisciplinary forum that will improve our current understanding of the role of brain histamine and provide the fundamentals necessary to drive innovation in clinical practice and to improve the management and treatment of neurological disorders

Books from Finland 2004 through out the current period of educational change geography education has also changed the innovations may be the starting point to affect conceptual change and paradigm shifts geography education assimilates and integrates knowledge skills and scientific methodologies the ten articles in this book illuminate a wide range of topics of interest to geography education in their article skarstein and wolff discuss how the interplay between the environment society and economy pillars of sustainability thinking play out on scales of time space and multitude and how geography teachers can support the students understanding of sustainability yli panula et al analysed used teaching and learning methods to find out good ones for promoting sustainability in geography the same idea can be found in duffin's and perry's article on place based ecology education in their article dür and keller discuss the topics of quality of life sustainability and global justice based on the goals of education for sustainable development evaluation is an important part of learning it is reviewed by schauss and sprenger regarding climate change education the following two articles deal with students views of landscapes worth conserving in both studies students expressed concern about the state of the environment yli panula et al found that the mexican students seldom considered their own activities in relation to the environment while yli panula et al stated that only some of the finnish and swedish students act as observers while others actively care for their environment the remaining three articles deal with teaching methods and models benninghaus et al present a benchmark method which allows statements about the quality of the maps diagrams in general Álvarez otero and de lázaro y torres on the other hand describe their technological pedagogical content knowledge model kopnina and saari discusses student assignments reflecting on the documentary film through critical pedagogy and ecopedagogy
