LOST CITIES & ANCIENT MYSTERIES OF THE SOUTHWEST

2010 the ancient mysteries have long attracted the interest
of scholars an interest that goes back at least to the time of
the reformation after a period of interest around the turn of
the twentieth century recent decades have seen an
important study of walter burkert 1987 yet his thematic
approach makes it hard to see how the actual initiation into
the mysteries took place to do precisely that is the aim of
this book it gives a thick description of the major mysteries
not only of the famous eleusinian mysteries but also those
located at the interface of greece and anatolia the
mysteries of samothrace imbros and lemnos as well as
those of the corybants it then proceeds to look at the orphic
bacchic mysteries which have become increasingly better
understood due to the many discoveries of new texts in the
recent times having looked at classical greece we move on
to the roman empire where we study not only the lesser
mysteries which we know especially from pausanias but
also the new ones of isis and mithras we conclude our book
with a discussion of the possible influence of the mysteries
on emerging christianity its detailed references and up to
date bibliography will make this book indispensable for any
scholar interested in the mysteries and ancient religion but
also for those scholars who work on initiation or esoteric
rituals which were often inspired by the ancient mysteries
