helping sophomores succeed offers an in depth comprehensive understanding of the common challenges that arise in a student s second year of college sponsored by the university of south carolina s national resource center for the first year experience and students in transition this groundbreaking book offers an examination of second year student success and satisfaction using both quantitative and qualitative measures from national research findings helping sophomores succeed serves as a foundation for designing programs and services for the second year student population that will help to promote retention academic and career development and personal

transition and growth praise for helping sophomores succeed lost lonely stressed pressured unsupported frequently indecisive and invisible many sophomores fall off the radar of campus educators at a time when they may most be seeking purpose meaning direction intellectual challenge and intellectual capacity building the fine scholars who focused educators on the first year and senior transitions have done it again a magnificent book to focus on the sophomore year susan r komives college student personnel program university of maryland for years student centered institutions have front loaded resources to promote student success in the first college year this volume is rich with instructive ideas for how to sustain this important work in the second year of college george d kuh chancellor s professor and director indiana university center for postsecondary research a pioneering work this brilliant text explores in practical and meaningful ways the all but neglected sophomore year experience when students face critical choices about their major their profession their life purpose betty l siegel president emeritus kennesaw state university all members of the campus community faculty student affairs educators staff and students will benefit from learning about the unique challenges of the second college year the book

provides research and best practices to help educators and students craft an integrated comprehensive approach to helping second year students succeed marcia baxter magolda distinguished professor educational leadership miami university the national resource center for the first year experience and students in transition supports and advances efforts to improve student learning and transitions into and through higher education by providing opportunities for the exchange of practical theory based information and ideas

Second Year Calculus

2012-12-06

second year calculus from celestial mechanics to special relativity covers multi variable and vector calculus emphasizing the historical physical problems which gave rise to the concepts of calculus the book guides us from the birth of the mechanized view of the world in isaac newton s mathematical principles of natural philosophy in which mathematics becomes the ultimate tool for modelling physical reality to the dawn of a radically new and often counter intuitive age in albert einstein s special theory of relativity in which it is the mathematical model which suggests new aspects of that reality the

development of this process is discussed from the modern viewpoint of differential forms using this concept the student learns to compute orbits and rocket trajectories model flows and force fields and derive the laws of electricity and magnetism these exercises and observations of mathematical symmetry enable the student to better understand the interaction of physics and mathematics

there is a saying about law school that they scare you to death the first year work you to death the second and bore you to death the third law students today have a pretty good idea what to expect from the initial plunge into the law scott turow s one l describing his first year at harvard has become almost mandatory reading for anyone contemplating law school and because that level of intensity is what so many expect that is how the first year usually plays out complete with ulcers outlines and relentless work but the education does not end after the first year law school is a three year course of study and the first year often bears little resemblance to the final two facing two more years of grueling

class work mounting student loans increasing pressure to stand out from the crowd and the never ending search for the perfect job upper class students come to realize that surviving the fall into the deep end is no guarantee they will learn to swim letters from law school is about the second year of law school after the cold shock of the plunge this book describes the struggle to come up for air

in spite of soaring tuition costs more and more students go to college every year a bachelor s degree is now required for entry into a growing number of professions and some parents begin planning for the expense of sending their kids to college when they re born almost everyone strives to go but almost no one asks the fundamental question posed by academically adrift are undergraduates really learning anything once they get there for a large proportion of students richard arum and josipa rokša s answer to that question is a definitive no their extensive research draws on survey responses transcript data and for the first time the state of the art collegiate learning assessment a standardized test administered to students in their first semester and then again at the end of their second year according to their analysis of more than 2 300 undergraduates at twenty four institutions 45 percent of these students demonstrate no significant improvement in a range of skills including critical thinking complex reasoning and writing during their first two years of college as troubling as their findings are arum and rokša argue that for many faculty and administrators they will

come as no surprise instead they are the expected result of a student body distracted by socializing or working and an institutional culture that puts undergraduate learning close to the bottom of the priority list academically adrift holds sobering lessons for students faculty administrators policy makers and parents all of whom are implicated in promoting or at least ignoring contemporary campus culture higher education faces crises on a number of fronts but arum and rokso s report that colleges are failing at their most basic mission will demand the attention of us all
