gac fruit momordica cochinchinensis spreng is rich in nutrients such as carotenoids particularly  $\beta$  carotene and lycopene fatty acids vitamin e polyphenol compounds and flavonoids this book provides the latest research on this fruit from cultivation through to novel processing technologies for health products it addresses several techniques for propagation and cultivation in order to increase the production and quality of gac fruit including traditionally used parts of the fruit aril and those whose value has not yet been maximized peel pulp and seed this plant has the potential to be a high value crop particularly as parts of the fruit can be processed into nutrient supplements and natural colorants currently only the aril is commercially harvested and this presents opportunities for upcycling the rest of the fruit

the present volume describes all organogallium compounds i e compounds containing at least one gallium carbon bond it covers the literature completely to the end of 1984 and includes many references to the literature up to the end of 1985 the organic chemistry of gallium is largely dominated by compounds of the types  $\text{GaR}_3$  chapter 1  $\text{GaR}_x$  chapters 2 to 12 and  $\text{Mgarn}_x\text{NLm}$  cation chapter 13 where  $x = 3$  n stands for a non carbon atom or any organic or organometallic group bonded to gallium through a non carbon atom the arrangement of  $\text{GaR}_x$  and  $\text{Mgarn}_x\text{NLm}$  compounds by n 3 n the kind of  $\text{Ga}_x$  bond is evident from the table of contents on pp xi to xiv the extensive use of pyrazolyl containing organogallium anions as polydentate donor ligands in transition metal compounds resulted in a particularly voluminous chapter on anions with  $\text{Ga}_n$  bonds 13 6 the volume is concluded by a few low valence organogallium compounds chapter 14 that i atom and an aromatic ligand in an tje fashion exhibit bonding interaction between a gallium due to a free coordination site at the  $\text{Ga}$  atom neutral compounds form many adducts with lewis bases symbol d these adducts are described along with the parent substances either in a subsection of the respective chapter or in a common table at the end of the table

georgia odyssey is a lively survey of the state s history from its beginnings as a european colony to its current standing as an international business mecca from the self imposed isolation of its jim crow era to its role as host of the centennial olympic games and beyond from its long reign as the linchpin state of the democratic solid south to its current dominance by the republican party this new edition incorporates current trends that have placed georgia among the country s most dynamic and attractive states fueled the growth of its hispanic and asian american populations and otherwise dramatically altered its demographic economic social and cultural appearance and persona the constantly shifting cultural landscape of contemporary georgia writes james c cobb presents a jumbled panorama of anachronism contradiction contrast and peculiarity a georgia native cobb delights in debunking familiar myths about his state as he brings its past to life and makes it relevant to today not all of that past is pleasant to recall cobb notes moreover not all of today s georgians are as unequivocal as the tobacco farmer who informed a visiting journalist in 1938 that we georgians are georgian as hell that said a great many georgians both natives and new arrivals care deeply about the state s identity and consider it integral to their own georgia odyssey is the ideal introduction to our past and a unique and often provocative look at the interaction of that past with our present and future

toxic cyanobacteria blue green algae have now been reported in 27 countries and are found on all continents including antarctica drinking water authorities world wide are faced with the challenge of treating contaminated water or the possibility of a toxic bloom occurring sometime in the future this tailored collaboration project was to provide the international drinking water industry with information to facilitate the confident application of viable treatment techniques for cyanotoxins assessment included toxicity of the ozonated solutions assessment of the protein phosphate inhibition assay technique and the possibility of seeding an activated carbon filter with select bacteria for removal of microcystin lr this report offers valuable guidance to the water supplier to aid in deciding upon the most appropriate treatment options for a range of dissolved blue green algal toxins

published in 1964 a history of georgia agriculture describes the early land and labor systems in the state agriculture came to georgia with the first settlers and was largely directed toward the economic self sufficiency of the british empire james c bonner s portrayal of the colonial cattle industry is prescient of the later open range west he also clearly shows how shortages of horses and implements poor plowing techniques and a lack of skill in tool mechanics spawned the cotton slaves mules trilogy of antebellum agriculture which in turn led to land exhaustion and eventual emigration by the 1850s the general southern desire for economic independence promoted diversification and such scientific farming techniques as crop rotation contour plowing and fertilization planting of pasture forage to improve livestock and hold soil was advocated and the teaching of agriculture in public schools was promoted contemporary descriptions of individual farms and plantations are interspersed to give a picture of day to day farming bonner presents a picture of the average southern farmer of 1850 which is neither that of a landless hireling nor of the traditional planter but of a practical man trying to make a living
