1893

this monograph presents a general theory of weakly implicative logics a family covering a vast number of non classical logics studied in the literature concentrating mainly on the abstract study of the relationship between logics and their algebraic semantics it can also serve as an introduction to abstract algebraic logic both propositional and first order with special attention paid to the role of implication lattice and residuated connectives and generalized disjunctions based on their recent work the authors develop a powerful uniform framework for the study of non classical logics in a self contained and didactic style starting from very elementary notions they build a general theory with a substantial number of abstract results the theory is then applied to obtain numerous results for prominent families of logics and their algebraic counterparts in particular for superintuitionistic modal substructural fuzzy and relevant logics the book may be of interest to a wide audience especially students and scholars in the fields of mathematics philosophy computer science or related areas looking for an introduction to a general theory of non classical logics and their algebraic semantics

British and Foreign State Papers

1897

examining the nature of ufo evidence the authors present a primer for scholars skeptics and others uneasy about investigating the field of ufos the volume also brings together three bestselling authors david m jacobs budd hopkins and pulitzer prize winner john mack widely known for their writings on the controversial alien abduction phenomenon

Hertslet's Commercial Treaties

1877

i had not gone anywhere while still being at the same corner of the great boulevard observing life in its colors its good or annoying notes and its rhythm i m still in the same convoy of the living and the dead looking at me and observing you at the same time without any of us perceiving each other in this dull tumult that engorges us and hypnotizes us i greet you all and i come back with the same smile and another bunch of poems that is none other than notes of joy sorrow and love that sound and resound in our daily life in any case these notes do not rhyme with your taste or please your whim i apologize because i did not invent them as they fall naturally within the scope of my poetic contemplation they come to me and it is my duty to host them and distribute them all in their folly and naive naturalism as always i do not force you but i invite you to read this book and find the notes that resemble you or remind you of a life living experience even a friend or forgotten memories

A New Method of Learning the French Language
