cheng chin google scholar

Jul 02 2024

professor of physics university of chicago cited by 21 799 atomic molecular and optical physics

publications chin lab university of chicago

Jun 01 2024

coherent inflationary dynamics for bose einstein condensates crossing a quantum critical point lei feng logan w clark anita gaj cheng chin nature physics 14 269 2018 arxiv 1706 01440

uchicago pis chin lab

Apr 30 2024

experimental high energy physics website instrumentation with the goal of large area many square meters high spatial resolution measurements of particles photons and charged particles in 3 spatial dimensions

cheng chin receives 21 22 marian and stuart rice research

Mar 30 2024

professor cheng chin has received the 21 22 marian and stuart rice research award a divisional honor that provides 100 000 for intellectually exciting and innovative research ventures that enable new research directions

chinese journal of physics sciencedirect com by elsevier

Feb 27 2024

the chinese journal of physics publishes important advances in various branches in physics including statistical and biophysical physics condensed matter physics atomic molecular physics optics particle physics and nuclear physics

home chin lab university of chicago

Jan 28 2024

welcome to the ultracold atomic and molecular physics group in the department of physics and the james franck institute at the university of chicago here you will find a new and active research team

exploring the quantum world at the lowest temperatures scientists can achieve nearly a billionth of a degree kelvin above absolute zero
