modern italy may sound like an oxymoron for western civilization italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity we have a tendency when imagining italy to look to a rather distant and definitely premodern setting the ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of italian civilization the campo di siena saint peter s all of venice and san gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations as seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of italy the learning of history is always a complex task one that in the italian environment is complicated by the changes wrought everywhere over the past 250 years culture on the peninsula continues to evolve with characteristic vibrancy italy is not a

museum to think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the italian cultural condition and the writing of history itself

languages differ in how they describe space and such differences between languages can be used to explore the relation between language and thought this 2003 book shows that even in a core cognitive domain like spatial thinking language influences how people think memorize and reason about spatial relations and directions after outlining a typology of spatial coordinate systems in language and cognition it is shown that not all languages use all types and that non linguistic cognition mirrors the systems available in the local language the book reports on collaborative interdisciplinary research involving anthropologists linguists and psychologists conducted in many languages and cultures around the world which establishes this robust correlation the overall results suggest that thinking in the cognitive sciences underestimates the transformative power of language on thinking the book will be of interest to linguists psychologists anthropologists and philosophers and especially to students of spatial cognition
